Aluminum and aluminum alloys: aluminum nitride precipitation. Discussion 1215
aluminum oxide analyses in blast furnace metal and slag 255
annealing textures in rolled face-centered cubic 83
constitution of Ti-Al. Discussion 1213
creep and stress rupture behavior as function of purity. Discussion 532
creep correlations in alpha solid solutions of 959
creep of grain boundary in high purity 619
crystal structure of $TiAl$ 70
deformation textures 264
delay time for initiation of slip in 197
dynamic formation of slip bands in 1085
effect of alloying elements on electrical resistivity of. Discussion 530
on plastic properties of alpha solid solutions. Discussion 529
effect of aluminum: on melting point of gallium alloys 153
on internal friction peaks in iron wire 161
grain shape 755
grain structure of aluminum-killed, low carbon steel sheets. Discussion 511
isothermal transformation and properties of a commercial aluminum bronze. Discussion 520
lattice parameters of alpha solid solution in Ti-Al system 212
mechanism of grain refinement. Discussion 1190
observations on the tension texture 743
origin of porosity in castings of Mg-Al alloys 409
recrystallization in single crystals of, after plastic extension 501
rolling textures 76
stereoscopic view of Al-Sn alloy 758
structural studies of plastic deformation in single crystals. Discussion 526
subgrain formation during creep in high purity aluminum 965
surface hardening of crystals 841
Ti-Al system 609
twinning in 885
use of etch figures for micrographic investigations of commercially pure 385
Alloys: binary, solution of diffusion problems 91
low melting, thermal analysis 74
Analytical Representation of Certain Phase Boundaries. Discussion 1209

Discussion 1216
Wilson, W., Jr.: *Discussion: on Analytical Representation of Certain Phase Boundaries* 1210
on Effects of Tungsten or Molybdenum Upon the Alpha-Beta Transformation and Gamma Precipitation in Cobalt-Chromium Alloys 525
Work Hardening-Reannealing Cycle of Pure Silver, Discussion 1206
Wustite, reduction of 715
Wyatt, J. L.: *Strain Sensitivity of Commercial Purity Titanium* 1030

X

X-ray diffraction lines of lead scale 857
X-ray diffraction patterns: of aluminum 874
of $TiCr_2$ 851
of Ti-Cu alloys 769
X-ray method for measurement of retained austenite concentrations in steels 1327

Y

Yield point of iron 182

Z

Zeuch, C. F.: *Discussion: on Deleading Zinc Concentrate at the Parral and Santa Barbara Mills* 1182
Zinc, electrolytic, plant at Monsanto, Ill. 1149
Zinc and zinc alloys: constitution diagram of Cu-Zn 1079
creep behavior of zinc modified by copper in surface layer, Discussion 531
crystals, surface effects in slip and twinning 875
deformation of zinc bicrystals by thermal ratcheting 651
deleading zinc concentrate at the Parral and Santa Barbara mills 729
diffusion rates of zinc in alpha brass 1315
effect of zinc on melting point of gallium alloys 153
kinking in single-crystal tension specimens 1076
reversal of strain-induced martensitic transformation in Cu-Zn systems 1065
vapor pressures of zinc over AgZn alloys, Discussion 1220
Zinc sulphate solution, electrolysis of, Discussion 1178
Zinc sulphide, volatility and vapor pressures of 66
Zirconium-Chromium Phase Diagram 304
Discussion 1211
Zirconium and zirconium alloys: chlorination of zirconium oxide 733
crystallographic angles for zirconium 660
crystal structure of ZrB_2 631
effect of zirconium on Mg-Th and Mg-Th-Ce alloys 633
powder metallurgy of, Discussion 510
preferred orientation, Discussion 1196
Zr-C-B system 393
Zr-Cr phase diagram 304
Zone melting, principles 747
Zone refining processes 750
